SPECIFICATION - BROWSER

MOZILLA

We use Mozilla (http://www.mozilla.org) as our browser.

PREREQUISITE

1. IP addresses of the mail and IMAP servers.
2. Domain names of the mail and IMAP servers.
3. Domain name of your organization.
4. Your own username in both mail and IMAP server.

REQUIRED KNOWNLEDGE

No special knowledge is required.

INTRODUCTION

You are required to setup your browser to send and receive emails.

CONFIGURATION

Make sure you have the required software installed.

As root, run

```
# rpm -q mozilla mozilla-mail
```

If they are present, their names and versions will be shown.

You need to do the following configuration steps as you – normal user.

1. Ask your SMTP team for the following items:
    - IP address of the mail server

- FQDN of the mail server

2. Ask your IMAP team for the following items:

   - IP address of the IMAP server
   - FQDN of the IMAP server

3. Open a web browser, type `mozilla`

   ```
   # mozilla
   ```

   or press the red lizard icon on the panel at the bottom of your screen.

4. Select **Tasks** menu and then **Mail & Newsgroups**.

5. In **New account setup**, select **Email account**......

   - Type in your name in **Your Name** and your email address in **Email Address**.
     e.g.
     Your Name: `Be happy`
     Email Address: `behappy@keep-similing.org`
   - In **Server Information**,
     e.g.
     Incoming Server: `choose IMAP`
     Server Name: `10.1.1.4`
     Outgoing Server:
     Server Name: `10.1.1.1`
   - In **User Name**, enter your username in the SMTP server.
     e.g. `behappy`
   - In **Account Name**, enter your email address in the organization.
     e.g. `behappy@keep-similing.org`

TEST YOUR BROWSER SETUP

Testing on sending emails can only be done when your SMTP team finishes the mail server setup. Testing on getting emails from your IMAP mailbox can only be done when your IMAP team finishes the IMAP server setup. Ask them for the server readiness before testing.

Send emails

1. Click **Compose** button.

2. Send an email to yourself.

   e.g. If you are **behappy@keep-similing.org**, send an email to `behappy@keep-similing.org`.

Get emails

1. Click **Get Msgs** button.
2. Type in your password.

(ATTENTION: Unless you have already had emails in your mailbox, you will not see any email. Send yourself any email before doing testing.)
