Crse Status: Active  
Apprv. Status: Approved

Competitive Programming  

This course introduces the data structures and algorithms useful in programming competitions. Students will learn efficient implementations of these data structures and algorithms as well as basic problem-solving skills for programming competitions. Topics include but are not limited to advanced data structures, advanced search algorithms, decomposition techniques, combinatorial games, basic computational geometry, and basic number theory.

本科介紹編程比賽常用的數據結構及演算法，學生將學會這些數據結構及演算法的有效實踐，以及編程比賽之基本解題技巧。主題包括但不限於高級數據結構、高級搜索算法、分解技術、組合遊戲、基本計算幾何和基本數論。

Grade Descriptor:

A  
EXCELLENT - exceptionally good performance and far exceeding expectation in all or most of the course learning outcomes; demonstration of superior understanding of the subject matter, the ability to analyze problems and apply extensive knowledge, and skillful use of concepts and materials to derive proper solutions.

有關等級說明的資料，請參閱英文版本。

B  
GOOD - good performance in all course learning outcomes and exceeding expectation in some of them; demonstration of good understanding of the subject matter and the ability to use proper concepts and materials to solve most of the problems encountered.

有關等級說明的資料，請參閱英文版本。

C  
FAIR - adequate performance and meeting expectation in all course learning outcomes; demonstration of adequate understanding of the subject matter and the ability to solve simple problems.

有關等級說明的資料，請參閱英文版本。

D
MARGINAL – performance barely meets the expectation in the essential course learning outcomes; demonstration of partial understanding of the subject matter and the ability to solve simple problems.

有关等級說明的資料，請參閱英文版本。

F

FAILURE – performance does not meet the expectation in the essential course learning outcomes; demonstration of serious deficiencies and the need to retake the course.

有關等級說明的資料，請參閱英文版本。

Equivalent Offering: 
Units: 3 (Min) / 3 (Max) / 3 (Acad Progress)
Grading Basis: Graded
Repeat for Credit: N
Multiple Enroll: N
Course Attributes: 

Topics:

COURSE OUTCOMES

Learning Outcomes: 
At the end of the course of studies, students will be able to:
1. Implement basic algorithms and data structures useful in competitive programming
2. Further learn advanced algorithms in competitive programming by themselves from online resources

Course Syllabus: 
Week 1: Binary index tree, Sparse table
Week 2: Monotonic stack and monotonic queue
Week 3: Advanced Depth-First Search (e.g. Bridges)
Week 4: Heavy-light decomposition
Week 5: Divide-and-conquer, repeated squaring
Week 6: Square-root decomposition; Mo's algorithm
Week 7: Midterm exam
Week 8: Combinatorial games
Week 9: Basic computational geometry
Week 10: Basic number theory; linear sieve
Week 11: Fast Fourier transform
Week 12: String searching (e.g. KMP)
Week 13: Advanced topics

Assessment Type:
- Examination: 70%
- Homework or assignment: 30%

Feedback for Evaluation:
1. Quiz and examinations
2. Course evaluation and questionnaire
3. Question-and-answer sessions during class
4. Student consultation during office hours or online

Required Readings:

Recommended Readings:

OFFERINGS
1. CSCI2740

COMPONENTS
LAB: Size=50; Final Exam=N; Contact=2
LEC: Size=50; Final Exam=Y; Contact=2

ENROLMENT REQUIREMENTS
1. CSCI2740
   Enrollment Requirement Group:
   Prerequisite: CSCI2100
   New Enrollment Requirement(s):
   Pre-requisite = CSCI2100
